SOFTWARE ENGINEERING TECHNOLOGY STUDENT

Analytical | Results-Driven | Detail-Oriented

PROFILE

Analytical and results-oriented Software Engineering Technology student specializing in Artificial Intelligence. Combines a strong academic foundation in software development, AI concepts, and data analytics with extensive professional experience in corporate performance management and project coordination. Proven capability to deliver high-quality technical solutions, robust system requirements, and strategic data insights.

PROFESSIONAL SUMMARY

- Foundational understanding of software engineering practices, Agile/Scrum collaboration, and requirements analysis.
- Proven capacity to deliver quality data analysis, management reports, and statistical summaries in high-paced, deadline-driven environments.
- Applied experience with relational database, entity-relationship modeling, SQL query design, and secure software development.
- Skilled with development tools including Git/GitHub, Visual Studio Code, Linux/Ubuntu, Bash, and Oracle VirtualBox.

KEY SKILLS

- **Programming Languages:** Python, Java, C, PHP
- **Web & Technologies:** HTML5, CSS3, JavaScript, React, REST APIs
- **Developer Tools & OS:** Git, GitHub, VS Code, Linux/Ubuntu, Bash, VirtualBox
- **Database & Engineering:** Relational Database Design (SQL), Agile/Scrum, SDLC, UML, SRS
- **Soft Skills:** Problem-solving, cross-functional collaboration, project coordination, meticulous attention to detail

EDUCATION

Software Engineering Technology – Artificial Intelligence Specialization | Jan. 2026 - Present

Centennial College, Toronto, ON

- Relevant Courses: Web Application Development, Web Interface Design, Programming (Python, Java, C), Database Concepts (SQL), Linux/Unix OS, Software Requirements Engineering

Bachelor of Commerce, Business Administration | April 1994

University of Poona, Pune, India

SELECT PROJECTS

MemoryKeeper App (UI/UX Design, System Requirements & Modeling) | Sept. 2026

- Collaborated to design a comprehensive Software Requirements Specification (SRS) for a senior care application, managing 17 requirements and 13 detailed use cases.
- Created complex UML models including a domain class diagram, state machines for escalation timers, and a Party Analysis Pattern to manage flexible user roles.
- Ensured system design accommodated PIPEDA & PHIPA compliance standards, role-based access control, and strict non-medical boundaries.

SOFTWARE ENGINEERING TECHNOLOGY STUDENT

Analytical | Results-Driven | Detail-Oriented

Enterprise Database System (SQL, Relational Schema & Query Interface) | Aug. 2026

- Applied relational database concepts, including entity-relationship modelling and normalization, to design a comprehensive enterprise schema.
- Designed complex SQL queries and constraint designs for data retrieval, generating technical cheat sheets for project demonstrations.

Skill Swap Web Application (HTML5, CSS3, JavaScript, Agile/Scrum) | Apr. 2026

- Designed and developed a responsive, user-friendly frontend interface for an educational skill-sharing platform using HTML5, modern CSS3, and JavaScript.
- Implemented interactive UI components, mobile-responsive layout grids, and dynamic form validation while managing workflows via Agile sprint backlogs and GitHub version control.

OTHER EXPERIENCE

Specialist – Corporate Performance | May. 2014 – Dec. 2022

Dubai Customs, Dubai, U.A.E

- Co-developed long-term corporate goals and the Strategic Planning Framework aligned with Dubai and UAE government directives.
- Coordinated strategic and operational plans across business units to ensure full alignment with corporate objectives.
- Implemented a performance management system to monitor strategic plan execution, generate progress reports, and resolve operational bottlenecks.
- Maintained documentation for the Balanced Scorecard (BSC) Scoring System and aligned departmental Key Performance Indicators (KPIs) with corporate targets.

Analyst, Corporate Performance | Jan. 2009 – April 2014

Dubai Customs, Dubai, UAE

- Gathered, validated, organized, and analyzed departmental performance data to support corporate reporting and decision-making.
- Produced management reports, statistical summaries, charts, and presentations from complex data sources.
- Managed and tracked approximately 50 projects while maintaining accuracy, deadlines, and reporting requirements.

CERTIFICATIONS & ADDITIONAL TRAINING

- Kaplan-Norton Balanced Scorecard Certification Boot Camp - Palladium
- Project Management Professional Preparation Course - Site Power
- Internal Assessor for Government Excellence Training Course - Dubai Government Excellence Program
